

XPEDO has been a leader in application of magnesium with our pedal products.

The same advanced methods are used to form the SLM magnesium sole for a lighter and stiffer cycling shoe. The thermal characteristics of magnesium allow efficient heat dissipation for additional comfort during severe hot weather conditions. The seamless perforated uppers offers great breathability and sweat evaporation.

Thermal Chart

Magnesium has its advantage over the other metals.

MAG

STIFF MAGNESIUM SOLE
MAXIMIZES POWER TRANSFER

- Full length, one piece magnesium sole, great heat dissipation and vibrant absorption.
- Stiff Magnesium maximizes power transfer.

- Seamless one piece upper provide low wind resistance and comfort.
- Ultra lightweight design.

Highly breathable

Micro adjustable ratchet buckle system

Air-breathable insole
